Important, information is available for the Sheriffs of (state).

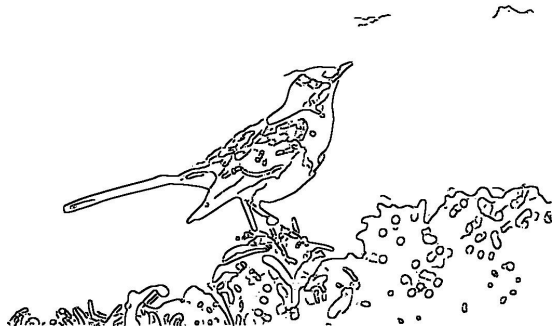

on above site click at: "to police and military"

On the web page is a video from Sheriff Richard Mack. I recently placed documented examples of how the U.S. Federal government is still a dangerous entity, with a quote from New World Order (NWO) leader Henry Kissinger: "Military men are just dumb stupid animals." In my opinion, they think the same of Sheriffs who follow federal dictatorship.

The federal government's actions show a long term disregard for the safety of Sheriffs near the Mexican border.

Although all the individuals inside the federal structure are not bad people, much of the controlling influence remains hostile to the best interests of innocent, hard working American people.

### **But who, really, runs the U.S. Federal Government?**

When Americans were as free as birds, the government was largely under the watchful eye of a representative congress.

Now, congress, the president, military and agencies are mostly under the control of foreign interests.

It is treason to give that authority to foreign interests.

Good people inside the Federal Government are gaining some control, and it has been a struggle, but they need some support from Sheriffs and others.

The most important message here is that the value of the County Sheriff to the despots controlling our Federal Government is a negative value - a minus. That means they do not want Sheriffs **to exist**, except perhaps for a short period of time while Sheriffs gain the confidence of the people in a county during martial law, and confiscate firearms. What need do they have for Sheriffs after that?

"Homeland Security" = **IN** security

So, how do some try to justify federal control of counties?

1. **terrorism** 9-11 was, clearly, a proven hoax. Their latest 'bogey men' are supposedly Americans who want to be free.
2. **natural disasters** Disaster relief can be handled by Sheriffs, with federal aid when necessary - minus federal control.
